## DESCRIPTION

Let's just say that romance can be fleeting. The wild and risky banana had yet another love that he picked from a field of many ripe with affection for him. The bee was a little "jelly" of the whole situation. Jealousy soon turned to rage, and the bee vowed to jam the whole thing up. Bananas Foster is Forever but so aren't strawberry fields...only time will tell how this bizarre love tryst between inanimate fruit and a lonely bee will end. This lighter, fruitier take on our award-winning Bananas Foster Forever combines our classic BFF with delicious strawberry. This combination sweet and tart is like a one-two punch of deliciousness to your mouth.
